-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

This application contains claims directed to the following patentably distinct species: Various autoimmune diseases (see claim 7) and various infectious viruses (see claim 13). The species are independent or distinct because the various autoimmune diseases have different etiologies and natural disease courses. The various autoimmune diseases are thought to arise from aberrant immune responses to specific cellular antigens; experimental models are developed by inoculating specific antigens in combination with Freund's Adjuvant, for example, rheumatoid arthritis models have been developed by injecting collagen into experimental animals (see McDevitt). Likewise, it is well known in the field that the various viral diseases by definition have different etiologies and respond to various immunostimulants differently (see Medical Virology, 4th ed. especially p. 271 ff.). Human hepatitis type C and certain papilloma viral infections respond to interferon α therapy whereas human immunodeficiency virus type 1 infections do not.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of a viral infection or an autoimmune disease for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-5, 7-10 and 13-15 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added; applicant must select one

Art Unit: 1648

autoimmune disease or one viral disease. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
